

ROTATIONALS

The best way to share advertising leads is with a rotational service from Smart Office Solutions and Total Number Technologies. Our system will fairly and accurately deliver your lead calls to any number of individuals in your rotation. Our rotation can service as little as two individuals, and as large as you can imagine. We provide live rotations where calls are forwarded to a live individual, or voicemail rotations where messages are received and delivered to each individual's mailbox.

ADVANTAGES:

- Simultaneous Calls Handled
- Ability For Unlimited Participants
- Unsupervised Lead Distribution
- Each Member Of Rotation Gets Own Toll-Free Number
- Distributes Advertising Telephone Costs
- Great For Co-Op Advertising

EXAMPLE:

Ten distributors work together and run a full page advertisement with one toll-free number in an industry magazine. None of the distributors know each other well. When the first call comes in, it is routed to person 1. When the second call comes in, it is routed to person 2. This continues until each participant has received a call, then the system starts the rotation over again. The distributors do not have to worry about the leads being distributed fairly.

Advertising campaigns using our Rotational system can be maintained by your corporate headquarters or by your sales leaders. With our system, you can join multiple advertising campaigns at the same time. Imagine the different markets our Rotational service can open up for your business!

ROTATIONAL USERS:

- Corporations
- Sales Teams
- Recruiters
- Mortgage Brokers
- Financial Managers

Our Rotational service can be setup independently, or can be added to our Unified Messaging service for a powerful virtual office solution. Contact us today for more information on how a rotational can help enhance your advertising and distributor productivity.
